Status: WOSB / EDWOSB certified
PSC: DA10, DA01
Payment Terms: Credit Cards Accepted

COMPANY OVERVIEW

Creatively Ewe delivers mission-ready web platforms and ongoing lifecycle governance for federal agencies.
We leverage a privately developed PHP framework to deploy secure, high-performance Website-as-a-Service offerings, paired with a standalone post-deployment subscription service, providing ongoing Section 508 compliance.

CORE COMPETENCIES

- **Full-Stack WordPress & Theme Engineering:** Rapid deployment of secure, high-fidelity web configurations utilizing our privately developed PHP and UI/UX frameworks—delivering fast, brand-aligned layouts while compressing project timelines and natively embedding WCAG 2.2 AA accessibility standards.
- **Citizen-First UX & 21st Century IDEA Alignment**: Flat, one-level navigation grids and task-focused interfaces eliminate multi-level dropdown mazes and accelerate public information discovery.
- **Concierge Content Governance & Lifecycle Maintenance:** A standalone, post-deployment subscription service utilizing secure, dedicated intake pipelines to execute content modifications—systematically safeguarding data integrity, eliminating design drift, and maintaining strict Section 508 compliance.

DIFFERENTIATORS

- **Zero Staff Training & Least-Privilege Security:** Structural code and administrative layers remain locked under vendor governance, eliminating internal CMS training and backend password risks.
- **30–90 Day Milestone Rollout:** Three-phase delivery provides a live interactive prototype at Day 30 and full production launch, in most cases, by Day 90**.**
- **On-Demand FedRAMP-Authorized Infrastructure:** Client environments are provisioned upon contract award within dedicated, FedRAMP-authorized cloud infrastructure matched to your agency's security baseline.

REPRESENTATIVE PORTFOLIO PROJECTS

Civic Information Hub & Community Program Portal | Municipal Government | Prime | 2024 – 2026

- **Civic Information Architecture:** Deployed a unified WaaS portal with flat navigation and an indexed, searchable repository for ordinances and council records, while Integrating external Give Lively APIs and Stripe Payment Links with zero server-side financial data retention, backed by ongoing concierge maintenance.

Civic Operations & Citizen Transaction Portal | Municipal Government | Prime | 2021 – 2026

- **Unified Public & Service Portal:** Centralized council records, emergency notices, and department directories alongside utility bill and permit fee routing. Offloaded payment tokenization to Stripe's PCI-compliant infrastructure with zero server-side data retention while locking all layout layers under vendor control.

Standalone Public Assistance Micro-Site | Municipal Food Shelf Initiative | Prime | 2024 – 2026

- **Single-Page Citizen UX:** Launched a dedicated, mobile-first public portal featuring a prominent marquee call-to-action and scannable program details. Connected external Stripe Payment Links so public contributions processed directly on third-party infrastructure with zero server-side storage.
